

Enrollment Management Meeting Summary

The Latin School of Chicago

November 6th, 2023

On November 6th, administrators and staff held an enrollment management meeting to present the school to parents and showcase its features.

During the presentation, the administration focused on several areas, including Individualized Learning / Academics, Co-curricular Activities, Student Support, and DEI.

At the beginning of the meeting, the US Director, Nick Baer, spoke about academics at Latin. He explained that Latin is a school that offers students a chance to explore their passions and interests and that classes are not lectures. Students can receive additional academic support from faculty outside of class time and personalize their curriculum. Independent study and senior projects are also highlights of the Latin experience.

The Assistant US Director, Karen Horvath, discussed student support services at Latin. She highlighted the student support team's philosophy, which is proactive, multidisciplinary, individualized, and collaborative. Karen then explained the advisory program at Latin and emphasized the value of community times built into the schedule to create a close community.

Lastly, Elanor Majid spoke about Diversity, Equity, and Inclusion at Latin, including the MLK Day activities the school and teachers organize.

To end the meeting, Rachel Jacobson opened a Q&A session with the parents, who asked about entrance test timelines and curricular anchors.

The Head and Assistant Head of School did not attend the meeting.

If I were to run one of these meetings, I would make the meetings more interactive and personal to engage the parents further. However, I only know some aspects of the enrollment management process. I was not privy to any meetings that may have been more conversational before this meeting. Perhaps this was a first chance to hear directly from Upper School leadership?
