

Session 1

The Case against Innovation

Vehicles for self-expression

The purpose of Education:
Create Citizens

Help Kids be better humans

Knowledge is a consequence
of Experience

Highly-tuned B.S.
detectors

Computational X

Kids learn from
Experience

gary@stager.org

professorgarystager.com

Maybe you need to
run a Classroom
That's so interesting
and engaging such that
Students Want to be in
the moment and participate

Making the School
the best seven hours
of a Students life

Innovation vs

Self-Actualization?

Computing as

Project-based Mathematics

Local is more important
than Big 'change the world'
Challenges

bring in a learning
Corner

Digital vs.
Computational

Innovation is a
marketing term

My purpose in a larger

role could be Computational X

Computational Bio

Computational Chem

Art

Finance

Economics

Literature

less emphasis on Innovation

I can tie different subjects
together - that's a natural strength

Terms of what I aim to
provide students with is

~~the~~ Computing as a
tool of empowerment
so students can flourish in
the future

My vision, for interdisciplinary

work, a true indication,
would be teachers working
as a team to teach
a course

In my academic journey

at what moment did I

realize I could think independently

Academic Pluralism

AAUP declaration of principles?

Uncomfortable vs. Unsafe

Faculty Autonomy when collaborating on curriculum

Saddle River Country

Day is innovating

in applying AI

for teachers to help

w/ mental load

Sharing what I've

heard about AI

in this conference
in my presentation

Peop

Status Quo

inertia

Why people are resistant to change

Nothing to do with the ideas or prices themselves

The Ikea Effect

Dollar Metaphor

making change while
leaving things you're
trying to change

Concurrently

Techniques of Persuasion -

Praise versus ignoring
behavior

Positive feedback
is a more effective
way to bring about
change

Fear is not an
effective long-term
solution for change

Cognitive Dissonance

College Students
vs. high school students

* The messenger is the
target

What if "good processes"
lead to bad outcomes?

learn to think

versus

learn to code

Outcomes of phone
free schooling

reggio education?

How

What are the phone
use expectations
for faculty and staff?

Job Search

A job you led of persuaded
was creating the CSP1
End of Semester Celebration
